

Locality E-Scooter Survey February to March 2022

Response to Survey

Many thanks to the Marleigh residents who completed Locality's quick survey earlier this year (using postcards and SurveyMonkey) on whether to introduce E-Scooters to Marleigh.

The majority were in favour: out of 19 total responses, 15 (79% of respondents) stated that E-Scooters at Marleigh are a good idea.

4 out of 19 (21 % of respondents) thought they were not a good idea.

Of the 15 in favour, 14 said they would use E-Scooters: 5 people on a daily basis, 3 people monthly and 4 occasionally. 6 were not sure.

Anecdotal evidence suggests that people who are opposed to having E-Scooters at Marleigh are concerned about people leaving them lying around and public safety.

On behalf of the community at Marleigh, Locality has spoken to the E-scooter company, VOI, who are not opposed, in principle, to expanding the operational area slightly east to Marleigh. It will also require approval from Cambs County Council and Cambridge and Peterborough Combined Authority.

We will rerun the survey later in 2022 or early 2023 when more homes are occupied to get the views of a greater number of people.

Marleigh Travel Plan

All developments that will create a significant amount of movement must have a Travel Plan, the primary aim of which is to promote sustainable travel choices and reduce car travel.

If you are interested in seeing the Travel Plan for Marleigh, please contact: Ed Shortridge at WSP Edward.Shortridge@wsp.com/01223 558 050.
